

Git & GitHub Commands Documentation

Git & GitHub Commands Used During Setup

1. Update Ubuntu Packages

```
sudo apt update
```

2. Install Git

```
sudo apt install git -y
```

3. Verify Git Version

```
git --version
```

4. Configure Git Username and Email

```
git config --global user.name "adluri-phaneendra"
```

```
git config --global user.email "phani.pfte@gmail.com"
```

5. Clone GitHub Repository

```
git clone https://github.com/adluri-phaneendra/jmeter-perf-aiops-pipeline.git
```

6. Navigate to Repository

```
cd ~/jmeter-perf-aiops-pipeline
```

7. Create Project Folders

```
mkdir -p jmeter-tests
```

```
mkdir -p jenkins
```

```
mkdir -p results
```

```
mkdir -p test-data
```

8. Copy JMX File

```
cp /mnt/c/Users/LENOVO/Downloads/flask_datadog_apm_demo.jmx jmeter-tests/
```

9. Create README File

```
cat > README.md << 'EOF'
```

```
# JMeter AIOPS CI/CD Pipeline
```

```
EOF
```

10. Check Git Status

```
git status
```

11. Add Files to Git

```
git add .
```

12. Commit Changes

```
git commit -m "Added project structure"
```

13. Push Code to GitHub

```
git push origin main
```

14. Create Placeholder Files

```
touch jenkins/.gitkeep
```

```
touch results/.gitkeep
```

```
touch test-data/.gitkeep
```

15. Create .gitignore

```
cat > .gitignore << 'EOF'
```

```
results/
```

```
*.jtl
```

```
*.log
```

```
apache-jmeter*
```

```
EOF
```

16. Windows Git Bash Setup

```
cd /c/Users/LENOVO/Desktop
```

```
mkdir github-projects
```

```
cd github-projects
```

17. Clone Repository in Git Bash

```
git clone https://github.com/adluri-phaneendra/jmeter-perf-aiops-pipeline.git
```

18. Create Results Folder

```
mkdir JMeter_Results_file
```

```
touch JMeter_Results_file/.gitkeep
```

19. Copy JMX File in Git Bash

```
cp /c/Users/LENOVO/Downloads/sample_test.jmx JMeter_Results_file/
```

20. Verify Folder Contents

```
ls
```

```
ls JMeter_Results_file
```
